

## Infrastructure Funding Fact Sheet

In late 2021, the U.S. government passed the largest infrastructure spending bill in its history. The \$1.2 trillion **Infrastructure Investment and Jobs Act (IIJA)**, commonly known as the **Bipartisan Infrastructure Law (BIL)**, aims to provide a once-in-a-generation investment in the nation's infrastructure. BIL aims to:

- rebuild America's roads, bridges and rails;
- expand access to clean drinking water;
- expand broadband coverage throughout the nation;
- prepare infrastructure for impacts from climate crisis, cyber attacks and extreme weather;
- make improvements to ports, airports, rails and roads to strengthen the supply chain; and
- create new jobs to grow the economy.

### KEY NUMBERS OF BIPARTISAN INFRASTRUCTURE LAW

- **\$1.3 trillion** - Total amount of money allocated to infrastructure projects nationwide
- **\$550 billion** in new spending on U.S. infrastructure over five years
- **\$13.4 billion** allocated to tribal communities
- **\$12.5 billion** allocated to West Coast states (California, Oregon and Washington)

State, local and tribal governments will have access to this massive funding to considerably improve their infrastructure. Grants management professionals must prepare not only to secure the appropriate funds, but to manage this funding, which will notably improve communities and quality of life for many citizens. Below are additional resources to get started.
